# Working with you, for you.

# Who is Saint Francis Healthcare Partners?

Saint Francis Healthcare Partners (SFHCP), founded in 1993, is a cohesive network of independent healthcare practitioners, Saint Francis Hospital and Medical Center, and other facilities of Trinity Health Of New England working together to create the future of healthcare in our region.

This is accomplished through developing partnerships, programs, and innovations to reduce the total cost of care, improve the health of our patients, and establishes us as the network of choice for high quality providers.

“

*Saint Francis Healthcare Partners is a wonderful network of providers and the support of the Network Development team has enabled me to bridge connections for the best interest of our patients.*

Dr. Niamey Wilson
